Clear or Amber

1 gallon, 5 gallon, and
50 gallon options

18-20 oz. of
Gravel-Lok liquid :
1 five gallon bucket
of stones

Made in USA

Gravel Lok

-Designed to bond together a wide variety of aggregates to create a permeable and durable natural stone surface

-Gravel Lok is used in the decorative top layer of paving over compacted, open graded gravel or a topping for concrete surfaces

-A separation layer such is required between paved edges and soil

-As with any permeable surface system, the system may become clogged over time. Recommended cleaning depends on site conditions and the amount of sediments the system is exposed to

-Can bond aggregates from 0.25" to 2.5" in diameter

-Stone must be washed, without fines

-Meets ADA requirements when used to bind certain aggregates

-Clear Gravel Lok is to be used when the aggregate will be exposed UV.

-Amber can be used for applications that will not be exposed to UV.
