

## Product Data

Roll Size: 6.56' x 65.6'  
yield: 416.56 sq ft

Thickness: 120 mil

Tearing Resistance:  
94.7 N

ASTM D5635 Puncture  
Resistance: Pass

Tensile Strength:  
1600 psi

Can be cut to desired  
length with 6.56' width

Full skid is 16,66.24 sq ft

Made in USA

# Orange Peel

Orange Peel is a peel-and-stick waterproofing membrane that can be adhered to the wall or surface behind a green wall system.

Orange Peel is an easy to install, long lasting waterproofing solution. The top layer is specially designed to withstand consistently damp environments as well as exposure to fungi, bacteria, and plant roots. The closed-cell foam backing is coated with a strong adhesive for easy and secure installation. The backing also provides the waterproofing membrane with a layer of protection, separating the waterproofing layer from the surface Orange Peel is adhered to.

This product is easily cut to size with a sharp blade.

Puncturing the top, orange layer can result in water seeping through to surface behind Orange Peel.
