

Product Data

Nominal Cell Size:
12" x 12"

Expanded Grid Size:
8' x 29'
(232 sq ft)

Cells:
100% HDPE
CAS: 9002-88-4

Cable:
Stainless Steel (3/16")

Washers:
Stainless Steel

Cable Stops:
Copper

Depths:
4"
6"
8"

Made in USA

Slope Stabilization

Green Roof Solutions' Slope Stabilization System uses a cellular confinement system to provide protection against erosion while still allowing water to move through the system. This system uses stainless steel cable for strength and durability. The equipment for closing the cable stops can be rented or purchased from Green Roof Solutions.

Product	Cell Depth
GRS 400	4"
GRS 600	6"
GRS 800	8"

Properties	Test Method	Test Value
Material Composition	ASTM D1505	Recycled HDPE
Normal Sheet Thickness	ASTM D5199	1.78 mm
Environmental Stress Cracking	ASTM D1693	3500 hrs.
Stabilizer	ASTM E682	1% by weight
