

Wind Erosion Anchor

The Wind Erosion Anchor is our patented solution for keeping media, plant material, and wind erosion blanket in place on windy roofs.

Each anchor is comprised of a ribbed plastic shaft with base disc and a plastic retention disc. The plastic retention discs attach to the shaft more firmly and are more lightweight than our steel disc options.

Retention discs resist pulling up from shaft up to 60-100 N of direct force.

FEATURES AND BENEFITS

- Easy to install
- Lightweight
- Specifically designed to manage wind erosion or media and plant material on roof decks

PRODUCT DATA

Material	100% virgin polypropylene
Shaft Height	12"
Anchors per Box	100
Full Skid	800 anchors (8 boxes of 100 anchors)
U.S. Patents	No. 8,127,515 No. 7,966,779
Warranty	5 years*

* Green Roof Solutions is not liable for damage created from disks coming loose from the shaft
