

VersiCell Drainage Panels

VersiCell is a sub-surface drainage panel that provides the ultimate combination of strength and water flow capacity.

The modular, connectable are frequently used where fast, high volume water flow is critical.

VersiCell 2050 / 3050 are rigid, whereas VersiCell 3150 can flex and conform to curved surfaces.

FEATURES AND BENEFITS

- Modularity makes for fast, easy installation
- Panels can be trimmed in place
- Superior strength and flow capacity
- Honeycomb design results in high compressive strength with minimum weight
